

2020 REPORT

Alabama Tourism Industry Economic Impact

KAY IVEY
GOVERNOR

Alabama Tourism Department

LEE SENTELL
DIRECTOR

Alabama’s travel industry survived pandemic better than 45 other states

By Lee Sentell

Robust spending by tourists at Alabama beaches in 2020 allowed the state to rank in the top five in the nation for the smallest percentage drop in travel expenditures during the international pandemic, Alabama Tourism Department director Lee Sentell says.

Tourism dollars spent in Alabama dropped 20 percent compared to the previous year, versus a nationwide average drop of 42 percent, according to Travel Economics. Expenditures in Baldwin County, home to most of Alabama’s beach accommodations, slipped only 6 percent.

“Baldwin County’s success is all the more remarkable when you factor in that the beaches were closed for six weeks in the spring and one week due to a hurricane in the fall,” Sentell said. He credited the decision by Gov. Kay Ivey to reopen the beaches last May 1 in mitigating the losses.

Overall, visitors to Alabama spent \$13.3 billion for food, accommodations, travel, shopping and incidentals, according to the Alabama Tourism Department.

Even before the pandemic, the department focused its 2020 strategy on outdoor experiences – positioning that led the state to minimize the pandemic’s impact. More than 12 million people visited the state’s 21 state parks including the six million tourists who enjoyed Alabama’s pristine white sand beaches at Gulf State Park.

Guests paid more than \$890 million dollars in taxes to state and local governments. Those taxes saved the average state family an estimated \$427 a year in taxes for services, officials said.

The state’s travel and hospitality industry employed more than 165,000 workers last year. An economic impact analysis using a model developed by Montgomery economist Dr. Keivan Deravi said that every \$119,842 in travel industry spending creates one direct job in Alabama. Some 111,482 direct jobs led to the creation of 53,747 additional or indirect jobs.

Prior to the pandemic, the amount tourists spent in Alabama had grown 85 percent in the decade after the Deepwater Horizon oil spill, setting records during each of the succeeding nine years.

Economic Impact

ALABAMA TRAVEL INDUSTRY 2020

Tourism helped fund 165,230 jobs last year. Every \$119,237 of expenditures in the travel industry creates one direct job in Alabama. For every two direct jobs created, the Alabama economy indirectly creates one additional job.

**\$49,280,744 of
Alabama's 4% state
lodging tax goes to the
state's General Fund.**

Executive Summary

- Travelers are estimated to have spent \$13.4 billion in Alabama in 2020. This represents a decrease of 20 percent as compared to 2019 spending.
- Based on the primary and secondary data, it is estimated that more than 22.5 million people visited the State of Alabama during 2020.
- In 2020, more than \$800 million of state and local tax revenues were generated by travel and tourism activities. Without those taxes, each household in Alabama would have had to pay \$427 in additional taxes to maintain current service levels.
- Travel industry expenditures represent 6.1 percent of Alabama's Gross Domestic Product – overall production – in 2020.
- An estimated 165,230 jobs – 8.3 percent of non-agricultural employment in Alabama – were directly or indirectly attributable to the travel and tourism industry.
- The total impact of the travel and tourism industry on Alabama's earnings in 2020 is estimated to be \$4.6 billion.
- Every \$119,842 of travel-related expenditures creates one direct job in Alabama.
- For every \$1 in Alabama's travel-related expenditures, the state retains a total of \$0.34.
- The most visited counties in the state were Baldwin, Jefferson, Madison, Mobile and Montgomery, accounting for 67.5 percent of the total number of visitors to the state.

2020	13,360,238,399

Introduction

The economic disruptions and shutdowns the COVID-19 pandemic caused in 2020 disproportionately impacted the tourism and travel industry. The 2020 Alabama tourism statistics are neither a true representation of the state's potential nor its future trend. Instead, they represent a snapshot in time of the interruption of the industry's normal operations by an extraordinary worldwide situation. The pent-up demand for travel by consumers, along with an incomparable level of public sector reinforcement, is providing a clear and substantial economic boost to the travel industry. Going forward in 2021 and beyond, the economic growth platform provided by these factors will be the biggest that has been seen in decades.

The purpose of this study is to estimate the economic impact of the travel and tourism industry in Alabama for 2020. Information sources used to prepare this report included primary data, detailed monthly lodging tax data, copies of previously commissioned economic impact studies and other relevant information and publications. State lodging tax data analyzed for this report was on a "by month of expenditure" basis. The data was provided by the Alabama Department of Revenue. This study also used information obtained from selected issues of "Impact of Travel on State Economies" (The Research Department of the U.S. Travel Association [USTA]). Any, and all, revisions in travel industry multipliers or adjustments in primary data by USTA have been incorporated into the Alabama 2020 report.

Additional sources of information were used in preparing the 2020 economic impact study. Information on hotel occupancy rates and lodging revenue generation was obtained from Smith Travel Research. The results of field-intercept surveys that were conducted in previous years at locations and events throughout the state were also utilized.

Economic impact analysis was performed using a model developed by retired economics professor Dr. Keivan Deravi, who is president of Economics Research Services, Inc., an Alabama-based consulting firm. This model, designed for the Alabama Tourism Department and the State of Alabama, uses Alabama industry multipliers developed by the Regional Input-Output Modeling System, United States Department of Commerce, Economic and Statistical Division, Bureau of Economic Analysis, Regional Economic Analysis Division.

Data collection and report compilation was done by Alabama Tourism Department staff member Pam Smith.

We wish to express our appreciation and thanks to Dr. Deravi for his assistance in the preparation of this report.

April 13, 2021

Estimates of the Number of Visitors, Hotel and Motel Occupancy Rates, and Average Room Rates for the State of Alabama

The detailed information pertaining to hotel and motel occupancy rates, average room rates, room demand, and room revenue was obtained from Smith Travel Research (STR). STR data and venue survey results obtained from site-intercept studies conducted from 2000 to 2005 were used to estimate the number of visitors for the State and for the top five counties in terms of travel expenditures. More specifically, the room demand for calendar year 2020, the average number of nights staying in the area, and the average number of people in a party were used to estimate the total number of visitors who used the lodging establishments. The data was then adjusted to include the number of people who chose not to stay overnight. This information was obtained from previous years' venue survey research. The results are shown in *Table 1* and *Table 2*.

Table 1
Estimated Total Number of Visitors for the State of Alabama and Selected Counties

County	Total Number of Visitors		Number of Travelers Staying in Hotel and Motel Accommodations	
	<u>2019</u>	<u>2020</u>	<u>2019</u>	<u>2020</u>
Baldwin	6,880,489	5,956,566	1,876,702	1,720,322
Jefferson	3,551,223	2,394,076	2,262,129	1,525,026
Mobile	3,336,851	2,813,422	1,942,047	1,637,412
Madison	3,657,178	2,810,094	2,541,739	1,953,015
Montgomery	1,964,373	1,224,802	1,196,362	745,941
Other Counties	9,343,292	7,320,751	9,940,221	7,904,491
State of Alabama	28,733,406	22,519,710	19,759,201	15,486,207

Source: Smith Travel Research

Table 2
Average Hotel Occupancy Rates and Room Rates for the State of Alabama and Selected Counties

County	Average Occupancy Rate (%)		Average Room Rate (\$)		Room Supply (Hotel and Motels) Annual Monthly Average*	
	<u>2019</u>	<u>2020</u>	<u>2019</u>	<u>2020</u>	<u>2019</u>	<u>2020</u>
Baldwin (hotel only)	60.6	53.9	134	132	196,335	196,437
Jefferson	66.0	47.9	98	82	423,121	408,366
Madison	70.4	53.2	92	81	216,455	220,078
Mobile	60.9	53.3	82	77	233,700	230,026
Montgomery	67.1	50.3	85	71	194,466	195,798
State of Alabama	63.0	49.6	92	82	2,325,910	2,321,227

*Room Supply is the number of rooms available multiplied by the number of days in a month.

It is estimated that more than 22.5 million visitors made Alabama their travel destination in 2020. It is also estimated that Baldwin, Jefferson, Madison, Mobile, and Montgomery counties attracted the largest numbers of travelers. More specifically, 67.5 percent of the travelers chose these counties as their destination.

Travel Industry Expenditures in Alabama

In 2020, it is estimated that travelers spent more than \$13.4 billion in Alabama. This represents a decrease of 20 percent as compared to 2019 spending, as shown in *Table 3*.

Table 3
Travel Expenditures in Alabama

Year	Expenditures	Change
2020	\$13,360,238,399	-20%
2019	\$16,777,421,546	8%
2018	\$15,558,256,428	---

In order to compare the growth of travel industry expenditures to Alabama’s overall economy, travel expenditures for 2018 through 2020 were adjusted for inflation and then compared to the growth rates in the state’s Gross Domestic Product and the service sector.

Table 4
Real Rates of Growth in 2018-2020*

Year	Alabama Gross Domestic Product	Services	Travel Industry
2020	-2.4%	-0.6%	-20.7%
2019	1.1%	1.8%	7.1%
2018	2.6%	2.4%	7.9%

As shown in *Table 4*, growth in the travel industry for 2020 is less than growth in the Alabama Gross Domestic Product and in the service sector.

Documenting the travel industry’s importance and its contribution to the state economy, this report notes that travel-related expenditures represent 6.1 percent of all statewide economic activities in Alabama.

*Source: Bureau of Economic Analysis (BEA), U.S. Department of Commerce. For the Alabama Gross Domestic Product and Service percentage changes, the 2018 and 2019 numbers are actual numbers and the 2020 figures are our estimates.

In *Table 5*, direct travel expenditures in Alabama are listed by category. This serves to identify the industries most impacted by travel and tourism spending.

Table 5
Travel Expenditures by Category - 2020

	Expenditures	Share of Total
Lodging Facilities	\$1,781,978,538	13%
Eating and Drinking Establishments	\$3,574,782,094	27%
General Retail	\$1,308,023,124	10%
Entertainment	\$1,279,878,075	9%
Public Transportation	\$1,960,591,350	15%
Auto Transportation	<u>\$3,454,985,218</u>	<u>26%</u>
Total	\$13,360,238,399	100%

The largest single travel expenditure was made on eating and drinking. This category (food services in general) accounted for 27 percent of all the travel and tourism spending in the state. Transportation and lodging were the next largest travel expenditure categories.

Travel - Generated Employment

In 2020, an estimated 111,482 Alabama jobs were directly attributable to the travel industry. These jobs were created in direct response to services demanded by travelers in the state. The employment industry breakdown is presented in *Table 6*.

Table 6 indicates that the biggest beneficiaries of travel-related employment were eating and drinking establishments. This sector accounted for 54 percent of all the travel-related jobs created in the state in 2020. Other industries that benefited strongly were lodging facilities and entertainment.

Table 6
Travel-Related Direct Employment - 2020

	Persons Employed	Share of Total
Lodging Facilities	22,497	20%
Eating and Drinking Establishments	59,877	54%
General Retail	7,585	7%
Entertainment	13,817	12%
Public Transportation	2,853	3%
Auto Transportation	<u>4,853</u>	<u>4%</u>
Total	111,482	100%

The job creation process, however, does not end with direct employment. Each job created by travel provided income for those employed in the above sub-sectors of the economy. This income generated expenditures, which in turn, created additional demand for goods and services and thus, more jobs in the state.

This indirect job creation is known as the multiplier effect or economic impact. *Table 7* shows the direct, indirect, and overall job impact of the travel industry on Alabama employment.

According to *Table 7*, the 111,482 direct jobs led to the creation of 53,748 additional, or indirect, jobs in the state in 2020.

Table 7
Travel Industry Total (Impact) Employment - 2020

	Direct	Indirect (Other Industries)	Total
Lodging Facilities	22,497	14,207	36,704
Eating and Drinking Establishments	59,877	22,568	82,445
General Retail	7,585	3,372	10,957
Entertainment	13,817	5,332	19,149
Public Transportation	2,853	1,801	4,654
Auto Transportation	<u>4,853</u>	<u>6,468</u>	<u>11,321</u>
Total	111,482	53,748	165,230

This overall job creation impact of 165,230 jobs is impressive. According to this analysis, 8.3 percent of all the non-agricultural employment in the State of Alabama in 2020 was directly and indirectly associated with the state’s travel industry.*

Furthermore, the analysis shows that every \$119,237 in travel industry spending creates one direct job in Alabama. Finally, for every two direct jobs created, the Alabama economy indirectly creates one additional job.

Travel-Generated Earnings

Travel expenditures in Alabama lead to employment, which in turn leads to additional earnings. Travel industry direct earnings for Alabama in 2019 are presented in *Table 8*.

Table 8
Travel-Related Direct Earnings - 2020

	Earnings	Share of Total
Lodging Facilities	\$507,195,641	20%
Eating and Drinking Establishments	\$1,065,017,791	42%
General Retail	\$176,967,834	7%
Entertainment	\$367,567,147	14%
Public Transportation	\$279,410,871	11%
Auto Transportation	<u>\$164,240,859</u>	<u>6%</u>
Total	\$3,202,326,409	100%

*The 2020 Alabama state non-agricultural employment was 1,986,100. This information was provided by the Alabama Department of Industrial Relations – Labor Market Division.

It is estimated that, in 2020, the travel industry was responsible for generating over \$2.6 billion in direct earnings in Alabama. The growth rate in direct travel-related earnings shows a decrease of 20 percent as compared to 2019.

Again, the largest beneficiaries appear to be eating and drinking establishments and lodging facilities. The overall impact of travel expenditures on earnings is presented in *Table 9*.

Table 9
Travel Industry Total (Impact) Earnings - 2020

	Direct	Indirect (Other Industries)	Total
Lodging Facilities	\$507,195,641	\$445,520,652	\$952,716,293
Eating and Drinking Establishments	\$1,065,017,791	\$831,672,392	\$1,896,690,183
General Retail	\$176,967,834	\$111,188,891	\$288,156,725
Entertainment	\$367,567,147	\$262,001,862	\$629,569,009
Public Transportation	\$279,410,871	\$239,985,997	\$519,396,868
Auto Transportation	<u>\$164,240,859</u>	<u>\$141,066,473</u>	<u>\$305,307,332</u>
Total	\$2,560,400,143	\$2,031,436,267	\$4,591,836,410

The total impact of the travel industry on Alabama’s earning power is estimated at about \$4.6 billion for 2020. This includes direct earnings of nearly \$2.6 billion and an indirect impact of more than \$2 billion. This suggests that the industry was responsible for 3.3 percent of total earnings in the state in 2020.

Additionally, every \$1 in travel-related spending translates to \$0.19 in direct earnings. The indirect impact is estimated to amount to an additional \$0.15 in earnings, bringing the total to \$0.34.

This suggests that for every \$1 in travel-related expenditures, the state directly and indirectly retains \$0.34 in earnings for its citizens.

Travel-Generated Tax Revenue

Table 10 highlights the impact of travel-related industries on state and local government revenues.

Table 10
Government Revenue Associated with Travel Industry 2018-2020

Year	State Revenue	Local Revenue	Total	% Change
2020	\$577,839,587	\$231,676,714	\$809,516,301	-20.0%
2019	\$722,711,634	\$289,761,139	\$1,012,472,773	6.1%
2018	\$681,125,686	\$273,087,834	\$954,213,520	---

We estimate that in 2020, more than \$800 million in tax revenues were realized, primarily due to travel-related activities. These revenues were in the form of income, sales, excise, property, and corporate income taxes. Without those taxes, each household in Alabama would have had to pay \$427 in additional taxes to maintain current service levels.*

As a result, we estimate that every \$1 in travel-related spending resulted in \$0.04 and \$0.02 in tax revenue for state and local governments, respectively.

*The U.S. Census 2010 number of Alabama households was 1,897,576 (updated for 2019). This information was provided by the U.S. Census Bureau.

Alabama Travel Data by Region

The following is a comparison of Alabama travel data tabulated according to the four Alabama regional tourism divisions:

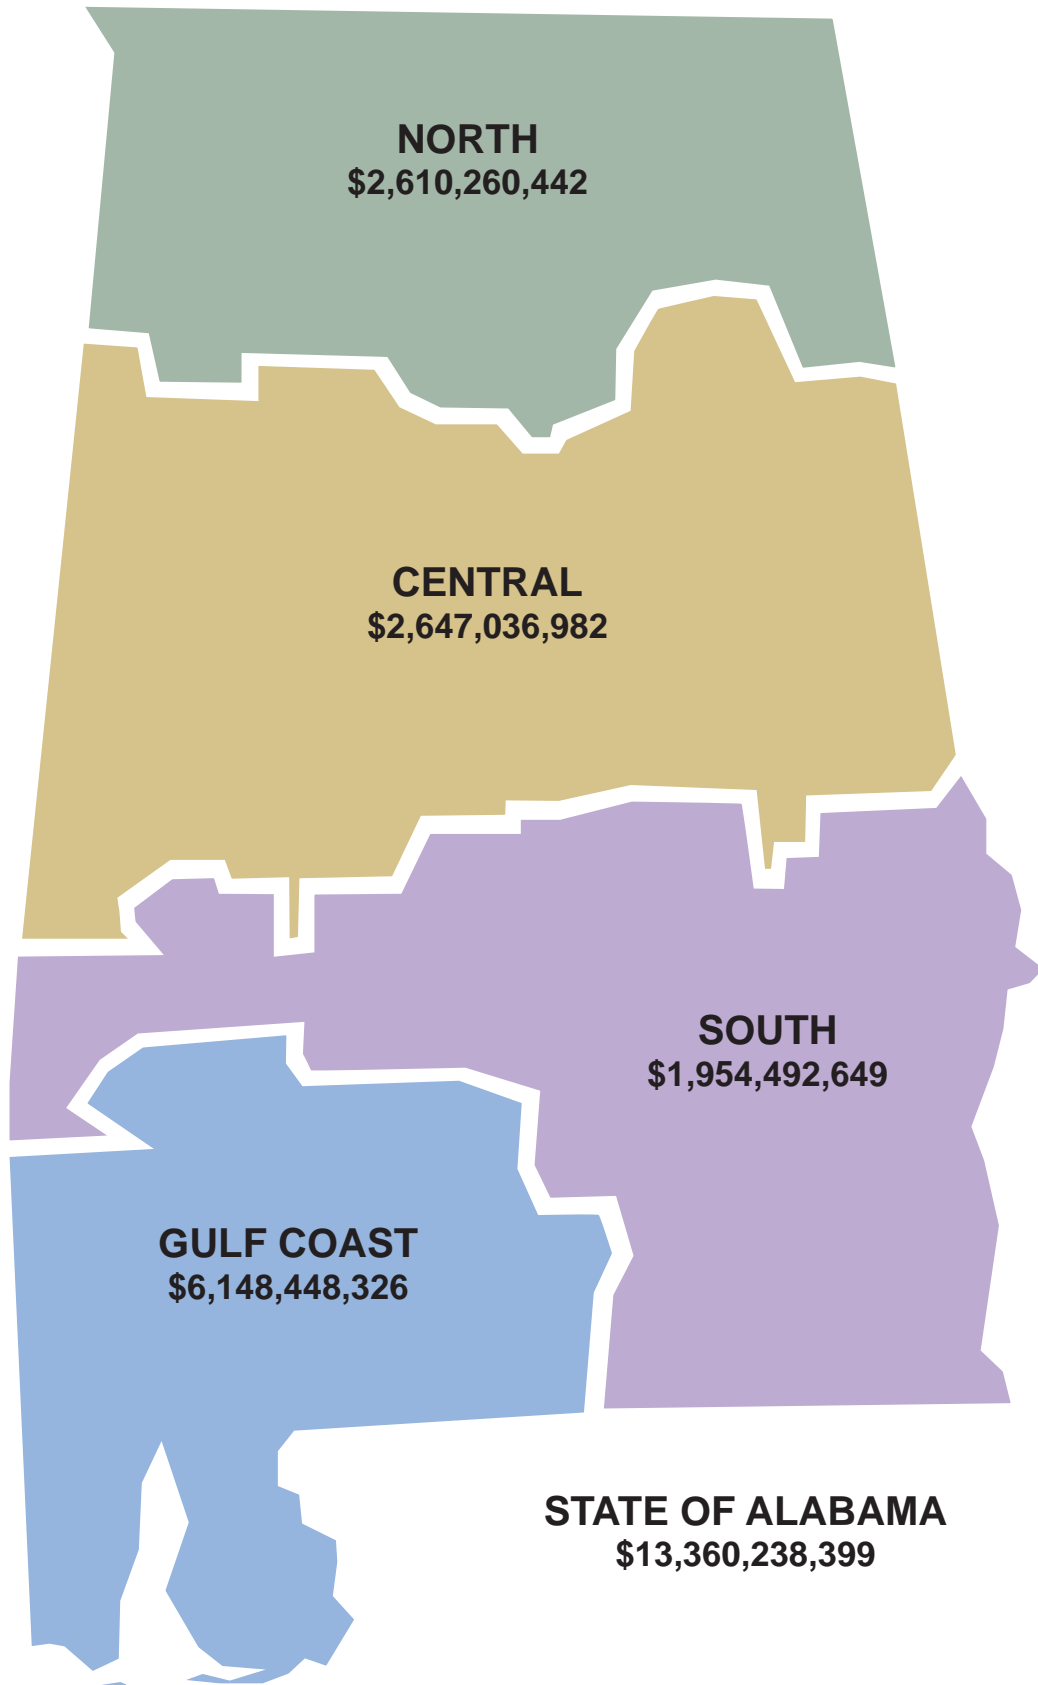

Table 11
Alabama Regional Tourism Data

<u>Total Expenditures (\$)</u>	<u>2019</u>	<u>2020</u>	<u>Growth</u>	Percentage of State Total

Travel-Generated Employment: County-By-County Basis

Total travel-generated employment in 2020 was distributed on a county-by-county level on the basis of each county's share of total lodging expenditures. The results are reported in tables on the following pages, as explained below:

Table 12, on page 13, represents direct travel-generated employment for each county and the rate of annual change.

Table 13, on page 15, represents travel-generated total employment (both direct and indirect) in each county and the rate of annual change.

Table 14, on page 17, ranks the counties in Alabama, from greatest to least, based on the benefit received from travel-generated total employment in the state.

Table 15, on page 19, shows the 43 counties with the highest growth rate in travel-generated total employment.

Several conclusions can be drawn from the information presented in *Tables 12 through 15*, which are as follows:

- Baldwin and Jefferson counties are, by far, the largest travel-concentrated counties in the state, accounting for 43 percent of all travel-related employment.
- Seven counties: Baldwin, Jefferson, Madison, Mobile, Montgomery, Shelby, and Tuscaloosa account for 121,609 travel-related workers, which is 74 percent of all travel-generated employment.

Other Table Listings:

Table 16, on page 21, provides the ratio of county quarterly-to-annual state lodging tax in 2020.

Table 17, on page 23, shows the metropolitan statistical area (MSA) share of state lodging tax per MSA.

Table 18, on page 23, shows the distribution of state lodging tax among designated demographic areas.

Additional information on *Tables 16 through 18* will be provided in the following section, starting on page 20.

Table 19, on page 24, shows travel-related earnings by county, including the annual growth rate.

Table 20, on page 26, shows travel-related expenditures by county.

Table 21, on page 28, contains annual state lodging tax data and provides the amount and percentage of annual change.

Lodging Tax—Seasonal and Designated Demographic Area Analyses

Seasonal Analysis—Quarterly lodging tax collections were used to gain insight into the seasonal travel-related activities in each county and at the state level. The results are reported in the graph shown below and in Table 16, on page 21.

The graph *Alabama Lodging Tax by Quarter* illustrates the ratio of the state’s quarterly lodging tax collection to its annual lodging tax.

- According to the graph, the combined second and third quarter period (April through September) appears to be the strongest travel-related season, with 58.1 percent of all state lodging taxes collected during this period.
- This graph also indicates that the first quarter (January through March) and the fourth quarter (October through December) were the least active travel and tourism periods, with 21.2 percent and 20.7 percent, respectively, of state lodging taxes being collected for each of these periods.

Table 16 represents the quarterly fluctuations for the seven counties in the state that have the highest levels of travel and tourism.

- Baldwin County shows the most seasonality in travel and tourism activities. Three-quarters (75 percent) of all 2020 lodging taxes in this county were collected in the second and third quarters. In the second and third quarters, 34 percent and 41 percent were collected, respectively.
- Of the seven major travel destinations in the state, all showed variations due to seasonality. Baldwin showed increased activity in the second and third quarters. Jefferson had increased activity in the first, third and fourth quarters. Mobile, Shelby and Tuscaloosa had increased activity in the third and fourth quarters. Madison and Montgomery showed increased activity in the first quarter of the year.

Table 16
Ratio of Counties' Quarterly to Annual Lodging Tax

	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
Baldwin	13%	34%	41%	12%
Jefferson	30%	19%	27%	25%
Madison	35%	17%	23%	25%
Mobile	23%	23%	28%	26%
Montgomery	32%	20%	23%	24%
Shelby	24%	23%	26%	27%
Tuscaloosa	23%	20%	30%	27%

Designated Demographic Area Analysis – In order to analyze area differences that may exist in terms of travel and tourism activities in Alabama, state lodging tax collections were grouped by Metropolitan Statistical Areas (MSAs).

At present, there are 11 MSAs located entirely in Alabama. These MSAs, and their counties, are as follows:

Anniston-Oxford	Calhoun
Auburn-Opelika	Lee
Birmingham-Hoover	Bibb, Blount, Chilton, Jefferson, St. Clair, Shelby and Walker
Decatur	Lawrence and Morgan
Dothan	Geneva, Henry and Houston
Florence-Muscle Shoals	Colbert and Lauderdale
Gadsden	Etowah
Huntsville	Limestone and Madison
Mobile	Mobile
Montgomery	Autauga, Elmore, Lowndes and Montgomery
Tuscaloosa	Hale, Pickens and Tuscaloosa

The state lodging tax share, presented by MSA and designated demographic areas, is found in *Tables 17 and 18* on page 23.

Table 17 shows the state lodging tax share of each MSA relative to the total lodging tax for the state. This information can be summarized as follows:

- 52 percent of all the lodging tax in the state is collected in these 11 MSAs.
- The Birmingham-Hoover MSA is largest in terms of travel-related spending.
- Huntsville MSA is second, Mobile MSA is third and Montgomery MSA is fourth in terms of travel-related spending.

In *Table 18*, MSAs are combined to form Designated Demographic Areas. These are as follows:

Northern Area	Decatur, Florence-Muscle Shoals, Huntsville and Gadsden
Central Area	Anniston-Oxford, Auburn-Opelika, Birmingham-Hoover, Montgomery and Tuscaloosa
Southern Area	Dothan and Mobile

Table 18 shows the lodging tax share of each area relative to the state. These results can be summarized as follows:

- The Central Area has the largest lodging tax share, with 26.8 percent of the state's total.
- The Northern Area is second, in terms of travel and tourism activities, with 14.8 percent of the state's total.
- The Southern Area is ranked third in comparison to the Central and Northern areas, with a 10.1 percent share of the state's travel and tourism activities.
